Assignments

The old Blackboard 8 server had a section called “Assignments.” The purpose of this section was to allow professors to assign tasks or homework to their students, but the section was really just a mirror image of the Course Documents section that had been renamed.

Because the sections were identical in every way but name, the “Assignments” section has been removed from the new Blackboard 9 server in order to streamline the interface and make it less cluttered.

If you still want to post assignments, you can do so through the Content Homepage link in the navigation section of the left-hand side of the page. Once you’re in the Content Homepage section, select Build Content > Item.
