These are the instructions to add your new Gmail account to your phone. These instructions are the same for your mail app or your Gmail app.

Before adding Gmail onto your mobile device, you first need to enable IMAP for your account. Go to webmail.villanova.edu and click the link below the login screen to enable IMAP.

Login with your Villanova credentials.
On the next page, as shown, chose Enable then enter your password again. The page will refresh and once completed, your settings will be adjusted.

Once completed, go to your phone and add an account. Chose Gmail.
Once completed, put in your Villanova email.
Once your email is accepted, you will be asked to login via the Webmail sign on.

Welcome. You have reached Villanova University’s Webmail Login Form. This login is for current VU students and employees. If you have forgotten your UserID or password, you may use the Self Service Reset Password Form.

If you are continuing to have difficulties authenticating into Villanova systems you may contact Technology Support Services by one of the following means.

Phone and Chat Support
A Helpdesk representative is available M-Th from 8-7 and 8-5 on Fridays @ 610-519-7777.

Chat Support is available M-Th from 9-7 and 9-4 on Fridays by clicking on the Chat Link located on the UNIT Homepage.

Walk-Up Service
The TechZone is located in Vasey 101 and is open M-Th from 9-7 and 9-5 on Fridays.

Once the settings are configured, your phone will allow you to choose what you want to sync.
