

Geography of South America

New Course Offering

GEV-4500

Spring 2012

MWF 10:30-11:20

Counts for Latin American Studies and Geography

Course Description

This class is an exploration of the geography of South America explored through the three main branches of Geography: Human Geography, Physical Geography, and Cartography. The first part of the course will introduce you to the region's physical geography and processes, including landforms, climate, and natural regions. The second aspect of the course will examine the human geographical aspects including the cultural patterns, politics, economic patterns, religion, and how the human geography relates to the underlying physical geography.
