A World of Opportunity

More than 5,000 job opportunities were posted for Villanova students through the Career Center in 2013. Advising sessions with Career Center counselors, along with resources available through the Villanova Career Library, help students choose majors and explore career options. Students gain poise and confidence through practice interviews, and professional development workshops provide students with the tools to create effective resumes and cover letters.

The Power of Networking

Frequent Villanova career fairs and networking events connect students and employers. Students and employers also stay in touch online through GoNOVA Jobs, a convenient career management and job posting system. In addition, the Villanova Career Connections program helps students explore career interests through the mentorship of other Villanovans.

“I could not have received better preparation from Villanova for the academic rigors of Georgetown Law through thesis papers, research projects and extracurricular leadership opportunities. I developed invaluable relationships with my professors, who challenged and guided me and to whom I continue to turn for support in navigating law school and my goals for the future. These opportunities gave me a passion for engaging in advocacy and service to those experiencing poverty and injustice, which has defined my future career path.”

The Villanova Difference

Versatility All Villanova Students—including those who major in the physical sciences, business, engineering and nursing—gain a strong intellectual foundation in the liberal arts. This context of history and humanism enables students to develop critical thinking and problem-solving skills in order to become versatile, well-rounded professionals.

Inspired Academics Villanova students are taught in the tradition of St. Augustine of Hippo, an intellectual great in the history of Western Civilization. The Augustinian tradition is based upon the “transformation of hearts and minds.” From their freshman year, Villanova students are taught to be effective, responsible leaders who realize their role in the larger community as is important as their own intellectual and professional growth.

An Investment in the Future

Villanova prepares its graduates for successful careers and rewarding lives. For Villanovans, success reaches beyond job titles and material wealth. It encompasses a passion for learning and includes a lifelong framework for critical thinking, ethical decision making and the use of your individual talents to benefit others. Each year, the Villanova Career Center collects and publicly shares data managed by the University’s recent graduates. This data includes graduate school placement, employment and salary statistics.

Wanted: Professional Savvy

Villanova students are in high demand. Through internships, international study experiences, professional development workshops, Villanova students not only expand their resumes, but they also develop the confidence and soft skills employers seek out.

Whether you’re looking for an internship with a top public relations firm or just starting to compile your professional resume, the Career Center provides a variety of opportunities and professional development services to prepare you for life after graduation.

Real-World Experience

The Villanova experience is unique among more than 2,200 colleges and universities. Villanova students participate in the world’s largest internship program, working at companies across the United States and abroad. In addition, students can participate in service learning projects, internships and other special programs—all of which make them more desirable candidates for employment.

Polished Young Professionals The Villanova Career Center and academic colleges have designed a series of professional development opportunities that enrich undergraduate coursework and classroom experiences. These opportunities include employer resume reviews, mock interviews, case competitions, and opportunities for current students connect with Villanova alumni. Additionally, each college often provides pre-professional development courses as a part of the undergraduate curriculum.
