This month, AIChE hosted an exciting Kahoot Trivia Night for all chemical engineers! Our four winners proved their trivia knowledge and won CampCo gift cards. AIChE is also hosting another virtual alumni networking event, open to all chemical engineering students. This is a nice opportunity for students to speak with alumni and learn more about the industry and job options that are open to them in the future. We are hoping to host more virtual (and hopefully in person later in the semester) events to keep us all entertained while also staying safe and healthy!
In the last few weeks of January and first few weeks of February, the American Society of Civil Engineers (ASCE) has been sending out weekly emails to its members. These emails have provided information about different events and opportunities that are offered to members of ASCE as well as engineering opportunities in the area offered by other organizations. Some of that information includes scholarships, training programs, National ASCE member information, and application options to get more involved with ASCE. Specifically, some of the scholarships advertised in these emails were the ASCE Philadelphia Section Scholarship and The Structural Engineering Institute (SEI) of Philadelphia Scholarship. Our ASCE executive board has been working to receive feedback from its members in order to provide events tailored to questions and interests within the club. One of the events our ASCE chapter hosted was a Virtual Networking Social with Bohler, a well-known engineering company throughout the area. Villanova ASCE has many more upcoming events that are in development. For more updates and information: follow ASCE on Instagram @villanovaasce, join our VUGroups page or email us at asce.villanova@gmail.com.
IEEE

To start the semester, IEEE hosted a successful technical interview workshop with Fast Enterprises before the career fair on campus. Students could participate in logic-based activities, mock interviews and learn problem-solving skills that can be implemented later in their careers. Looking ahead, IEEE is currently developing workshops that anyone can join this semester or the upcoming year. People should look forward to soldering, coding, and battling in our Sumobot workshop over the next few months to develop useful skills, permitting that in person events are allowed on campus. If you are interested in joining our team, please sign up through VUGroups, follow @villanovaieee on Instagram, and email villanovaieee@gmail.com with any questions you may have. IEEE wishes you all the best of luck for the rest of the semester!

ESC

ESC has started the spring semester by preparing for some virtual events such as speaker panels and a PI Day sticker design competition. ESC is also working with other organizations to prepare for E-Week including a potential trivia night or two. Be on the lookout for Wellness Kits provided by ESC soon!
NovaRacing

This month NovaRacing’s most exciting accomplishment was the completion of VU12’s front and rear wings: the first we’ve ever made! Other exciting moments included taking delivery of our new magnesium center lock wheels and hosting an internal Conceptual Design review for our next car, VU13. We have also been preparing for spring testing by diagnosing some engine troubles, modifying driver controls, and installing sensors to collect valuable data about the car’s performance. Soon we will be finishing the nose cone and continuing on track testing as soon as weather permits. Follow our Instagram @villanovafsae for frequent updates!
**Pi Tau Sigma**

Pi Tau Sigma (PTS) is the Mechanical Engineering Honors Society that provides tutoring for undergraduate students. Pi Tau Sigma is excited for our initiation of second and third year Mechanical Engineers this spring! As always, if you want some support or help in a class, please reach out to us to set up a session.

**SASE**

Although COVID-19 is still prevalent, NovaSASE has some exciting and safe events planned for this semester. First up, we are preparing for the Student Involvement Fair and hope it is going to be held in person as planned. A few days later, on February 27th, the national organization of SASE is virtually hosting its annual NorthEastern Regional Conference along with a virtual Career Fair on March 6th. Following the conference, we will have our first general body meeting of the semester where we will celebrate Women’s History Month by highlighting influential women in STEM. We will also play virtual games for chances to win prizes. Finally, we are working on a NovaxLehigh event where we will professionally collaborate with Lehigh University SASE chapter. There we will have alumni speak and our chapter will also meet with Lehigh’s chapter using zoom’s breakout rooms.
SWE

SWE is very excited to start off this Spring Semester! We have already had one General Body Meeting and are excited to have more! This semester we will continue to host more events such as a panel discussion with Villanova Alumni, service events to help organizations like Sisters Returning Home, and Coffee Chats with our executive board members. We are looking forward to more fun events and elections in the future!

Tau Beta Pi

Tau Beta Pi (TBP) is excited to start the spring semester. At the end of the fall semester, we inducted 34 new members from the College of Engineering’s junior and senior classes. We are excited to have them in our honor society. Later this semester, we will begin planning the spring induction ceremony as well as officer elections. We will also be sending a few members to the TBP District conference, which will be held virtually this year.
