Learning Resource Center: Multimedia Viewing Room

The Multimedia Viewing Room (Room 16) in the Learning Resource Center in the College of Nursing holds extensive computer, audiovisual and technical nursing resources and therefore provides additional strength to our program. Here you can avail yourself of a vast selection of audio-visual material and equipment, updated and maintained for the exclusive use of our undergraduate and graduate nursing students. As technology influences the field of health care, the College of Nursing incorporates these modalities into its educational programs.

Multimedia Resources

The Learning Resource Center has a variety of multimedia resources that are categorized by subject and reference number. Faculty, staff and students who wish to search the catalog of multimedia resources can view the web pages located here. Please note that these pages will require you to login. These resources may also be searched through the University’s Library.

Search the catalog of multimedia resources here.

The Learning Resource Center also has NCLEX preparation resources and books to help with difficult concepts.

Please note: Access to the Multimedia Viewing Room and multimedia resources requires students to sign in and submit their wildcard to LRC personnel.
