Infinity Scarf

Materials needed

- Scissors (Fabric Scissors preferred)
- White T-Shirt (Any Size, larger preferred for looser scarf)
- Ruler
- Optional: Needle and thread

Instructions

1. Spread your T-shirt flat
2. Cut through both sides of the shirt, removing the sleeves in the process
   i. Feel free to fold the shirt in half and cut through both sides at once.

3. **If Using the Tying Method:**
   Cut small slits into the bottom of your shirt (front and back), about 1.5” long and ½” - ¾” apart (the shorter the distance apart, the better the end product). Now you should have a row of slits on the front and back of the shirt.

   Take the slits from each side and double-tie them together. Continue this all across the bottom.

4. **If Using the Sewing Method:**
   After cutting out the sides, sew together the front and back of the shirt along the bottom. Use small stiches.
4. Cut straight across the top to remove the collar

5. Do the same to the top as you did to the bottom (refer to step 3)

6. Your finished project should have the front and back of the shirt tied or sewed together on the top and bottom
Produce Bag

Materials needed

- Scissors (Fabric Scissors preferred)
- White T-Shirt (size small or medium)
- Ruler
- Optional: Needle and thread

Instructions

1. Spread your T-shirt flat
2. Cut out the sleeves and collar, leaving the shoulders on to create bag handles

3. If Using the Tying Method:

Cut small slits into the bottom of your shirt (front and back), about 1.5” long and ½” - ¾” apart (the shorter the distance apart, the better the end product). Now you should have a row of slits on the front and back of the shirt.

Take opposite slits from each side and double-tie them together. Continue this all across the bottom.

If Using the Sewing Method:

After cutting out the sides, take the bottoms of the front and back and sew together with small stitches.
4. Your final product will have the bottom sewed or tied together, with two handles on top! You can cut out small slits about 2” long all around the bag to help with stretching. An easy way to make these are by folding the bag in half lengthwise and cutting across the fold.

5. Turn the shirt inside out to see the final product.
