From the Chair

One of the most exciting parts of any profession is the learning that takes place almost every day. Being open to learning for the sake of learning is a quality that comes naturally to some but must be worked on by others. One important part of any academic environment is imparting students with this quality. It becomes handy in the professional world in which success is largely dependent on one’s ability to adapt and grow in their profession, and, for most students, acquiring the tools necessary to achieve such success begins in their collegiate years. I say the above because it is important to have this frame of mind when making the decision about how to achieve 150 credit hours, which, beginning in 2012, will be mandated by law in the state of Pennsylvania in order to become a CPA. In this newsletter, we discuss this decision and the role it may play later in one’s professional career.

In this issue, we also highlight two of our professors: Tim Monahan and Janice Sipior. For the first time, we introduce you to our advisory council, which meets with me each semester and acts as both advisor and sounding board. Over the years, this board has been an immense resource to the department.

As always, we also highlight some of the wonderful service projects that involve our accounting students. Maria Manlowe VSB ’12, who completed an internship with Grant Thornton this past spring, provides a synopsis of a service trip to an area damaged by Hurricane Katrina. We also highlight the many awards that come about this time of the year, including our Medallion winners, who are voted as the most outstanding students in their class. Please read and enjoy the rest of the newsletter and do not hesitate to contact me if you have any questions, comments, or suggestions.

Best regards,

Michael F. Peters, PhD, CPA
Chair, Department of Accountancy & Information Systems
Villanova School of Business

Summer 2011
The 150 Credit Hour Rule

By Michael Peters, Chair, Department of Accountancy & Information Systems

Most states, including Pennsylvania, now require students to complete a total of 150 credit hours in order to become a Certified Public Accountant (CPA). While students previously could complete an accounting degree and the specific course requirements for the CPA with an undergraduate degree consisting of about 120 credits, this new state law forces them to complete additional credits beyond courses that were specifically required.

As a result of this change, for the majority of students who wish to begin their careers in public accounting—where most firms now require the 150 credit hours to be completed prior to employment—a decision must be made early in their collegiate careers as to whether to complete all 150 credit hours as part of the undergraduate curriculum or to finish the requirement as part of a Master of Accountancy program (MAC) or other graduate degree.

As Chair of the Accountancy and Information Systems Department, I often am approached by students who are seeking the best way to approach fulfilling the 150 credit-hour requirement. Rarely do I give two students the same advice, for I believe the best way to approach fulfilling the 150 credit-hour requirement. Many of our students who have chosen this path have found it to be instrumental in their ability to successfully compete in the job market and to exceed the expectations of their new employers. (See the following page for some recent examples).

The VSB MAC Program is designed to develop MBA-type skills and is tailored to students who are eager to avoid additional semesters of full-time coursework and the added expense and loss of earnings that comes with it. While most master's degree programs require a fifth year in the classroom, the majority of VSB’s MAC classes occur during the summer immediately after graduation, and students finish the master’s degree during the following academic year through distance-learning classes. In addition, undergraduate students who plan ahead are able to complete a few MAC courses during their senior year, further reducing tuition costs and accelerating completion of the graduate degree.

I welcome the opportunity to discuss the 150 credit rule and its implications.

What the Students are Saying

“The Villanova MAC Program took me to the next level. The program built on my undergraduate experience and challenged me to think critically. Whether it was with financial statement analysis, risk management, or the other classes, we were given the tools to succeed in the workplace. The professors in the MAC program were always there for you and treated students like professionals, so the expectations and rigor were at a much higher level, but the learning experience was worth it. I received an excellent undergraduate education, but I also believe that the MAC program was a necessary step in preparing me to face the challenges of the workplace.”

Robert Riley VSB ’10, MAC ’11
Currently works at PricewaterhouseCoopers

“As an undergraduate at Villanova, some accounting concepts took time to grasp and I truly began to see the relationship between my undergraduate accounting classes during my senior year. While I graduated with a strong GPA, I felt my major GPA was not indicative of my abilities and could impact my ability to land the right job. The Villanova MAC Program gave me the chance to satisfy the credit requirement as well as enhance my résumé. The MAC program solidified my understanding of accounting to a new level as it built on the foundation I learned during my undergraduate years. I eventually interviewed and received several full-time job offers from public accounting firms and ultimately accepted a position as an auditor at PwC in New York. There is no doubt in my mind I would not have had as much confidence and success in today’s job market without the Villanova MAC Program.”

Mark Gendron VSB ’10, MAC ’11
Begins works at PricewaterhouseCoopers in fall 2011

“I enrolled in Villanova’s MAC Program to meet the 150 credit hour CPA requirement and to obtain a higher level of education. The MAC program was the best decision I could have made for several reasons. One is the effect it had on my undergraduate experience. I did not have to overload my semesters with too many credits, which enhanced the quality of my undergraduate education and my overall college experience (e.g., opportunity to engage in leadership and other campus activities). The MAC program also challenged me to reach my highest potential and facilitated my networking capabilities. I highly recommend the MAC program for its exceptional faculty and resources, which provided me with the necessary guidance, knowledge, and experience needed to launch my accounting profession with full confidence, improved marketability, and a competitive edge.”

Kristin Imhoff VSB ’10, MAC ’11
Currently works at Ernst & Young
BASF Provides Scholarships to VSB Accounting Majors

This past year, BASF The Chemical Company began a scholarship program for undergraduate accounting majors at the Villanova School of Business. For the inaugural year, BASF awarded $2,500 scholarships to three students: Ellen Chiu VSB ‘13, Brad Johnson VSB ‘12, and Melissa Meggiolaro VSB ‘12. In addition to the scholarship, these three accounting majors were treated to a dinner with BASF executives.

The BASF scholarship process was headed by James Stone, vice president, Internal Audit North America, with the assistance of two Villanova alumni currently employed at BASF: Anthony Sellitto VSB ’67, director, Accounting Services North America, and John Mahoney VSB ’83, vice president, Assistant Controller North America. The AIS Department and VSB would like to thank BASF not only for their commitment to helping our students, but also for providing opportunities upon graduation.

BASF is the world’s leading chemical company; their North American affiliate is headquartered in Florham Park, New Jersey, with world headquarters located in Germany. The firm offers excellent internship and job opportunities to VSB students, referred to as the BASF Accounting Accelerated Development Program (ADP). This 18-month program includes a series of training assignments in which graduates rotate into different areas of the firm. The goal of the program is to develop technical knowledge in a manner that links accounting and finance concepts to business and operational activities at the regional and global level. These assignments include auditing, business forecasting and analysis, financial statement development, international financial accounting principles, and more. The opportunity to see many areas of the firm makes students eligible for a leadership role within the firm after completion of the ADP.

Members of the Accounting Advisory Council gathered at Bartley Hall for their bi-annual meeting with the Chair. The council provides support and direction with regard to AIS initiatives, curriculum, and development.

Tara Donovan, MIS graduated with an MIS major and with minors in Finance and Writing & Rhetoric. She belongs to the Beta Alpha Psi honor society and served as president of the MIS Society and vice president of VSB Peer Advisors. She was also on the steering committee for the inaugural VSB-Week. Donovan interned in New York City with KPMG in the IT Advisory practice, as well as in Dublin, Ireland at Kinsale Capital Management in a web development role. She will begin working full-time at KPMG LLP in New York City as an IT Enabled Transformation associate.

Gabrielle Kimball, Accounting graduated with a triple major in Accounting, Finance, and International Business. She is a member of the Beta Gamma Sigma and Phi Kappa Phi honor societies, and served as the executive director of Rays of Sunshine, one of the largest volunteer organizations on campus. As executive director, she was responsible for managing the executive board and overseeing over 200 volunteers and twenty weekly service trips to the Philadelphia area. She was also involved with VSB Peer Advisors and volunteered with Special Olympics.

Kimball participated in the study abroad program in London and completed an internship there with a small accounting firm. She also participated in an audit internship with Ernst & Young in Philadelphia. Kimball will start with Ernst & Young full time in fall 2011 in the Philadelphia Assurance line.

PICPA Outstanding Student

The PICPA (Pennsylvania Institute of Certified Public Accountants) Outstanding Senior Award is given to a senior at each Pennsylvania college or university who shines in academia, expresses a serious interest in accounting, and demonstrates a desire to continue in the accounting field. This year the PICPA Outstanding Senior Award was presented to Brent Geist VSB ’11.

Geist belongs to the Beta Gamma Sigma and Phi Kappa Phi honor societies, and was an active member of the Beta Alpha Psi honor society and the Accounting Society. A double major in Accounting and Finance, he studied abroad in London, England and Galway, Ireland, completing internships with both Venn Group and JP Morgan. Geist was a Resident Assistant and, as a violist, was involved with Villanova Pastoral Musicians, Villanova Orchestra, and the Villanova Small String Ensemble. He volunteered for Special Olympics and Rays of Sunshine and participated in two Habitat for Humanity trips to Mississippi. Geist will start work with Ernst & Young full time in fall 2011 in the Philadelphia Assurance line.

Society for Information Management Future Leader Award

Nishant Mehta VSB ’11 was awarded the Society for Information Management (SIM) Future Leader Award for outstanding achievement and potential for leadership in the Information Systems field. Mehta graduated in May 2011 cum laude in three years, rather than the traditional four years, with a major in Management Information Systems and minors in Finance and History.
Villanova Accounting Society – Message from the President

Dear Villanova Accounting Department Students, Faculty, and Friends:

It has been a privilege to serve as president of the Accounting Society, succeeding Cassandra Gengler. On behalf of the Accounting Society, I would like to congratulate the students, especially those that we classify as Members in Good Standing (see list on p.12), and my board, Michael Carbone, Meredith Del Mauro, Matthew McSherry, and Stephen Tully. I would also like to thank our recruiters and guest speakers for their outstanding support and contributions. Those professionals provided students with knowledge and offered great advice for those interested in joining the industry. They spoke on topics such as work-life balance, different lines of service, networking, interviewing skills, internship experiences, the CPA exam, and forensic litigation. During these events, students had the opportunity to expand their networking skills and learn about the culture of these firms.

We also hosted two panels. The first included professionals from mid-tier firms, which are firms that have either a national or large regional presence. The Society hosts this panel every semester and invites firms on a rotation basis. Students learned about the culture of the firms, the work-life experience, what makes them unique and attractive, and the excellent job opportunities with each of them. The second panel included seniors who have had previous internship experience. They provided valuable information to those younger classmates about their experience and steps that can be taken during freshman and sophomore years to best prepare for this opportunity.

The variety and quality of the Accounting Society presentations and events have continued to make it one of the premier student-run organizations in the Villanova School of Business. I look forward to the fall semester, which will be filled with more exciting and educational events. I encourage everyone to come out and hear about the firms, hone your professional skills, and network with the best that Villanova and the accounting industry have to offer.

Vivian Lee VSB ’13

Wayne Kaplan, VSB Accounting Advisory Council Member, Named Grant Thornton LLP Philadelphia Office Managing Partner

Earlier this year Grant Thornton LLP announced that Wayne Kaplan, a VSB Accounting Advisory Council member, was going to serve as the new Philadelphia office managing partner, effective August 1, 2011. “We are fortunate to have an individual of Wayne’s caliber, and I am confident that he will continue to serve clients and the firm with his characteristic commitment to excellence and professionalism,” said Louis J. Grabowski, Grant Thornton LLP chief operating officer. “He will play a key role in helping Grant Thornton achieve our goal to be the leading audit, tax, and advisory firm, serving dynamic organizations in our chosen markets.”

As the firm’s Philadelphia office managing partner, Kaplan will be responsible for all day-to-day operations in the office. He joined Grant Thornton LLP in 1995 with the merger of Grant Thornton’s Philadelphia office and AG Epstein Company, a local accounting firm based in Jenkintown, PA. He was promoted to manager in 1996, senior manager in 1998, and partner in 2000. In 2002, Kaplan became the audit practice leader for the Philadelphia office, and during 2006, he participated in the firm’s Partner Leadership Program.

In addition to serving on VSB’s Accounting Advisory Council, Kaplan is a member of the American and Pennsylvania Institutes of Certified Public Accountants. He graduated summa cum laude from The Wharton School of the University of Pennsylvania, with a dual major in Accounting and Finance.

VSB congratulates Wayne on this promotion, thanks him for his past efforts to strengthen our relationship, and looks forward to continuing to work with him and Grant Thornton LLP.

Philadelphia Area Research Colloquium: Earnings Quality Consequences of Hiring an Affiliated Auditor

Six years ago, Villanova founded the Philadelphia Area Research Colloquium (PARC) to sponsor high-quality accounting research seminars and to encourage interaction among faculty at nine Philadelphia area universities. In February, Villanova had the honor of hosting a PARC seminar by Professor William Baber of Georgetown University, entitled “Inventor Perceptions of the Earnings Quality Consequences of Hiring an Affiliated Auditor.” Professor Baber is one of the top researchers in his field and has taught at some of the top business schools in the country.

Professor Baber and his coauthors, Jagan Krishnan and Yingyi Zhang, examined whether empirical evidence supports two key provisions of The Sarbanes-Oxley Act of 2002 (SOX), namely the requirements that firms (1) wait at least one year before hiring an individual recently employed by a member of the firm’s external audit team and (2) establish audit committees that are fully independent from management and that include directors with accounting expertise. Their analysis involved an examination of firms that employed new financial executives during the period leading up to SOX. Consistent with the premise behind the new regulations, the authors found that investors are less influenced by firms’ earnings information immediately following hires of individuals recently employed by the firm’s external auditors. They further find that the negative effects of hiring affiliated auditors is reduced when firms have audit committee composition consistent with SOX regulation. The event was well-attended and generated enthusiastic discussion from PARC members.

Villanova School of Business Designates Gift Officer to Serve Accounting Firms and Alumni

Dear Villanova Accounting Department Students, Faculty, and Friends:

In response to the growing demand for services to accounting firms and alumni, Villanova School of Business Designates Gift Officer Lauren Kleckner, JD, as the new “point person,” will serve as a VSB liaison with all accounting firms and corporations. These are just a few of the many ways to increase firm visibility at VSB, enhance recruitment opportunities, provide invaluable support to Villanova, and make a significant impact on our students and University culture.

If you have not had a chance to meet with Lauren in person yet, she would welcome the opportunity to introduce herself to you, learn more about your experiences and successes since your Villanova days, and share with you what’s new at VSB and the University’s plans for the future.” Lauren can be reached at 610-519-7449 or lauren.kleckner@villanova.edu to discuss any questions you may have regarding various giving opportunities and ways that you or your firm can make the most of an impact at VSB.

The Newsletter for the Department of Accountancy & Information Systems at the Villanova School of Business
2011 Undergraduate Accounting Placements

The Department of Accountancy and Information Systems is having another banner year with regard to placing our accounting students. In May we handed out 128 degrees to students actively looking to begin their careers in the field of accounting. As of graduation, there were only two students (1.5%) still looking for an employment opportunity, yielding an overall placement rate of 98.5%.

The 126 students already placed at that time chose a variety of career paths. Ten of those students (8%) will begin graduate study in the fall—either in MAC programs or in law school. A total of 112 students (89%) will begin full-time employment, of whom 63 (57%) will do so at one of the international firms, most in the area of assurance.

Interestingly, of the 126 students, four (3%) have chosen to “give back” and have committed to a year of service before entering the workforce. Each of these students accepted full-time employment, but negotiated with their firms to defer their start date in order to help others less fortunate. While we are very proud of all of our students, we deeply appreciate the commitment of these four students!

Given the economic times we have experienced during the past months, we believe the ability of our students to reach both their academic goals and their career goals speaks quite well for their dedication and hard work.

Ernst & Young’s Tom McGrath Visits Campus

I n April, Tom McGrath, senior vice chair of markets for Ernst & Young (E&Y), participated in a campus visit that included meetings with faculty and administrators, a presentation to students, and lunch with E&Y interns and full-time hires. Several E&Y partners and professionals accompanied McGrath on the visit.

The discussions covered many topics, including internal changes happening at E&Y, significant trends in the field, and other issues pertinent to faculty. For students, interns, and full-time hires, the topics discussed were wide open, but included career options, steps to take to best prepare for your professional life, life and culture at E&Y, and how to succeed as a new professional. The visit was a resounding success, and VSIB is thankful that Mr. McGrath took time out of his busy schedule to visit campus and provide advice and wisdom on these topics.

MACs are Soaring Into the Marketplace

The Master of Accountancy Program (MAC) at the Villanova School of Business has opened many doors for its students. Villanova MAC students are in great demand amongst the accounting firms. A number of students entered the program already employed, but over half were in the job market. For the students who came into the program employed, the top three employers were PwC, Deloitte, and KPMG.

Of the students who were seeking employment in accounting, 100% secured a job before graduation. One of the strengths of the MAC program is its lock-step Professional Development Program (PDP). The PDP—which consists of job search help, resume support, networking, and other career management tools—is focused on preparing MACs for Villanova’s On-campus Recruiting Program (OCR), which starts late summer/early fall semester. MACs focus their efforts on either securing a spring internship or full-time position upon graduation. Opportunities to network on-campus with firms are planned and scheduled for the students, from picnics to formal meet-and-greets—leading to multiple touch-points with key recruiters and accounting executives. Armed with a strong academic background, as well as sharp job searching skills and business savvy, 60% of MAC students participating in OCR received job offers (both internship and full-time offers). By the end of February 2011, all MAC students seeking a job in accounting were employed. For job-seeking MAC students, the largest employers were PwC and KPMG. The Villanova MAC degree is unmatched in the marketplace. The combination of our comprehensive curriculum, PDP, dedication of staff, and high caliber of students prepare MACs students to meet the real-world, real-time challenges of global business and the accounting industry.

MAC 2011 TOP EMPLOYERS

- PricewaterhouseCoopers
- KPMG LLP
- Ernst & Young
- Deloitte LLP
- ParenteBeard LLP
- Crowe Horwath LLP
- Other*

* “Other” includes: Tyco; J.H. Cohn LLP; Fesnack and Associates, LLP; Drexel Hamilton, LLC; Regan, Levin, Bloss, Brown & Savichak, P.C. (RLB Accountants); Smith Elliot Kearns & Company, LLC; WithumSmith + Brown; Wouch Matoney & Co., LLP

Deloitte’s Warren Clark, AERS Partner, Speaks on Global Business

T his spring Deloitte LLP came to campus to present on the topics of “Doing Business in China” and “The Structure of Global Accounting Firms.” Students from the Accounting Society, Beta Alpha Psi, and the International Business Society attended in great numbers to hear Warren Clark, Audit and Enterprise Risk Services (AERS) partner in Deloitte’s Philadelphia office, speak about the structure of firms and his personal and career experiences.

From the time he was a college student, Clark knew he wanted to live and work in China, and he explained to the group how, with determination and dedication, he made that happen for himself, spending more than 12 years living and working in Shanghai and Beijing. Now back in the United States, Clark’s global experience continues through his work with Deloitte’s Chinese Resource Group, which works with U.S. companies looking to do business in China and Chinese companies doing business in the U.S. Robert McNeill VSB ’88, AERS partner and Deloitte Villanova Recruiting Champion, also participated by introducing Clark, sharing his insights on the global firm and answering numerous student questions. The presentation and interactive discussions provided valuable insights to the students about the rewards of professional and personal experiences outside the U.S., and the limitless possibilities associated with joining a global accounting firm in today’s global economy.
Accounting Majors Helping Mississippi Families

The newsletter for the Department of Accountancy & Information Systems at the Villanova School of Business | 11

L

ess than six weeks after Hurricane Katrina and its aftermath wrecked the Gulf Coast in August 2005, Robert Nydick, PhD, professor of management, and 10 of his management students headed south to assess firsthand what could be done to help those who were affected. Following that initial visit, Nydick has returned every semester with management colleague Daniel Wright, PhD, associate professor of operations and Chair of the Department of Management and Operations, and students, the number of whom participate to date exceeds 400. In the fall of 2009, Nydick invited James Emig, PhD, professor of management, to participate. While there would be no chain of command, every semester the participants of all other disciplines with a total of 15 representatives. While a new record was not set by the Villanovans on this Blitz Build, the team of seven students and five faculty members completed in just 40 hours what many individuals may never have the chance to accomplish in a lifetime.

The spring 2011 trip was notable for two reasons. First, this marked the second time the group attempted a “blitz”—to build an entire house, from foundation to roof, shingles to siding, flooring to installation of appliances, in less than two days! The first “Blitz Build” was completed in the fall of 2009 in just 44 hours. To beat Habitat’s record for fastest house built by volunteers, the Villanovan group set a goal to build their ninth house, from start to finish, inside of 36 hours. The other reason this trip is considered memorable for the AIS Department is that for the first time, accounting majors outnumbered the participants of all other disciplines by 10 representatives. While a new record was not set by the Villanovans on this Blitz Build, the team of seven students and five faculty members completed in just 40 hours what many individuals may never have the chance to accomplish in a lifetime.

No one could have predicted how many lives would be changed by one professor’s intentions to sincerely teach students the meaning of making good decisions. But surely, the number of families who have been given homes and the number of students who continue building relationships and houses together, even post-graduation, speak immeasurably for Villanovans everywhere. The prediction now is that “one day we will have probably last forever” is an experience unlike any other.

By Maria Manlove VSB ’12

Faculty News

Thomas (Tim) F. Monahan, PhD

Thomas (Tim) F. Monahan is the John M. Cooney Endowed Professor of Accountancy and Information Systems at Villanova University and served as dean of the Villanova School of Business (VSB), 1996–2003. Monahan currently teaches Auditing and Performance Measurement in VSB’s undergraduates, MBA, Master of Accountancy (MAC), and Executive MBA (EMBA) programs.

Before he joined Villanova’s faculty in 1981, Monahan was a tenured professor at LaSalle University and, prior to that, worked in the Treasurer’s Department of Becton, Dickinson and Company. Monahan has published research in many academic journals, addressing topics such as capital budgeting, integrating finance and strategy in decision making, evaluation and reward systems, improving decision models, and new models for accounting education.

Monahan currently serves as chair of the audit committee on the Board of Ariba, Inc., the leading provider of enterprise spend management (ESM) solutions. Over the past 10 years, he has also served as a consultant to over 30 Fortune 500 companies in the U.S., Europe, and Asia. Most recently, his clients have included Comcast, Dow Chemical, Exelon, LSI Logic, 3M, Philips Electronics N.V., SAG, and Sprint.

Much of his consulting work has revolved around valuation, strategic cost management, and helping managers understand how finance can be used to create value in a business.

Monahan received his PhD in accounting (1981) from Temple University, an MBA in finance (1974) from Rutgers University, and a bachelor’s degree in economics (1971) from Hofstra University. He is also a Certified Public Accountant.

Janice C. Sipior, PhD

Janice C. Sipior, PhD, is a professor of Management Information Systems (MIS) in the Department of Accounting & Information Systems (AIS). Her academic experience also includes faculty positions at the University of North Carolina at Greensboro and Canisius College. She earned her PhD at the State University of New York at Buffalo and was previously employed in computer planning at HSBC (Hong Kong-Shanghai Bank Corporation). Her research interests include ethical and legal aspects of information technology, privacy, system development strategies, and knowledge management. She has over 90 refereed publications in journals, conference proceedings, and books.

This year, Sipior is coordinating the annual VSB Global Accounting Firms Case Competition, in which teams of finance students apply Accounting and Information Systems skills to analyze a case. Sipior is also a member of the Dean’s Assessment Committee, is chairing a committee to develop the Accounting/MIS integrated curriculum, and chaired the Department’s Rank & Tenure Committee, the MIS Barney Medalion Committee, and the MIS Recruiting Committee.

Sipior also has significant international experience, having taught in Poland, Russia, and Lebanon. She has presented at various conferences on every continent (excluding Antarctica) and has been (or will be) the keynote speaker in conferences in Austria, Ireland, and Oman.

Sipior also serves as editor-in-chief of Information Systems Management, a senior editor of Data Base, an associate editor of Information Resources Management Journal, editorial board member of International Journal of Advanced Decision Sciences, and was co-editor of conference proceedings for Tech-Education 2010 and the World Summit on the Knowledge Society 2009, both held in Greece.
The following Accounting Society members have put their best foot forward this semester. They have fulfilled all member requirements, including paying annual dues and attending several society events. Thank you for all of your efforts and for helping to continue to improve the Department of Accountancy & Information Systems.
